

POSITION: FRONT END DEVELOPER (CONTRACT)

Hyperobjekt, a data visualization and web design company that partners with universities and nonprofits to create websites and apps for social good, is seeking a Front End Developer on a contract basis to assist with development and data visualization. We have a number of projects in progress and on the horizon, and thus ample opportunities for you to contribute.

We are seeking a coder with experience in:

- Mapping & plotting large datasets using Mapbox, eCharts, D3, and other data visualization platforms/libraries
- React and/or Angular
- ES6 & Babel
- Static site development (e.g. Hugo/Gatsby)

In their work, candidates should demonstrate a disciplined approach to

- providing clear and detailed documentation
- coding for accessibility
- ensuring cross-browser and -device compatibility

Additionally, to be ideal partners for our clients, candidates who can demonstrate a commitment to work on projects for social good are preferred.

Applicants who submit the following will be considered:

- Brief introduction
- Portfolio of work samples: deployed sites/applications, repositories, etc., with descriptions of your role in their development
- Details on your availability & rate.

To apply, please email jobs@hyperobjekt.com.

ABOUT US

HYPEROBJEKT (hyperobjekt.com) is a digital agency with a primary focus on translating academic research datasets into interactive visualizations that spark public engagement and further social good. Our work also includes design, copywriting, user experience consultations and smaller-scale website development.

Clients include:

- The Eviction Lab at Princeton University (evictionlab.org)
- The Educational Opportunity Project at Stanford University (edopportunity.org)
- The Basic Income Lab at Stanford University (basicincome.stanford.edu)
- The Child Poverty Action Lab (resourceexplorer.org)
